

# ARMBRUSTER ET-V 2500 VIBRATING HOPPER

## Overview

The Armbruster ET-V 2500 is an all stainless steel vibrating hopper best used for the receipt of half ton bins. Each model comes with a VFD controlled vibrating feed for optimal steady feed into a destemmer or sorting line for improved quality.

## Key Features

- Can receive the entire contents of a 1/2 ton bin
- Gentle transfer of grapes to a destemmer or sorter line up to 5 t/h
- Discharge by way of gentle vibration
- Easy to clean
- Slotted pre-dejuicing area to capture free run juice and separate out dry matter with tri-clover hose connection

## Equipment Details

- Made entirely of stainless steel 304
- Easily movable by forklift or set of four lockable steering rollers
- Variable frequency drive for controlled speed of discharge
- Electrical controls in stainless steel enclosure with remote on/off and five meters of power cable
- Includes adjustable frame with a range of discharge height from 40" up to 87"
