

ARMBRUSTER VST-F VIBRATING TABLE W/HOPPER

Overview

The Armbruster VST-F is an all stainless steel vibrating table with integrated hopper for the receipt of half ton bins. This machine combines the functions of a standard vibrating table and a loading hopper into one piece. This design gives customers with less footprint available the ability to receive fruit and manual cluster sort all with one machine.

Key Features

- Brings fruit in with consistent speed
- Adjustable output with VFD
- Easy to clean
- Slotted pre-dejuicing area with tank integrated to capture free run juice and separate out dry matter
